Military status: Exempted

Professional Summary

AI Developer with strong mathematical foundations and proven ability to build end-to-end intelligent systems, from algorithm design to deployment on cloud and mobile platforms. Recognized and recommended by my university professor for exceptional skills, dedication, and impact in AI and software development.

Education

Alexandria University 2021 – 2025
Bachelor of Data Science GPA: 3.79 / 4 (Excellent with honor degree).

Skills

- **AI & Machine Learning:** Large Language Models (LLMs), AI Agents, Retrieval-Augmented Generation (RAG), Machine Learning, Deep Learning (CNNs), Computer Vision (YOLO), Reinforcement Learning (RL), Generative AI, Text Mining, Model Optimization, AI System Design.
- **Data & Analytics:** Data Analysis, Data Science, Feature Engineering, Power BI, Excel, Statistical Analysis.
- **Mathematics & Foundations:** Probability, Linear Algebra, Optimization, Bayesian Statistics, Markov Chains, Experimental Design, Multivariate Analysis.
- **AI Engineering & Deployment:** FastAPI, Flask, Model Serving, API Integration, Cloud Deployment, Terraform (Infrastructure as Code), Scalable AI Systems.
- **Programming & Tools:** Python, Git, GitHub, Linux, Apache Kafka, Testing, Technical Documentation.
- **Additional Exposure:** IoT (ESP32, MQTT), Android Development, Distributed Systems, Networking, ERP/CRM Basics.

Soft Skills

- Self-directed learning – Communication – Presentation skills – Teamwork and Management – Navigating ambiguity – Problem Solving – Task Prioritization.

Projects

- **Graduation Project :** Traffic Manager Led the development of a smart traffic signal system trained via simulation and integrated with an IoT prototype. Achieved an average waiting time of 21 seconds per 30 minutes with fairness using Reinforcement Learning,

Simulation of Urban MObility (SUMO), Analysis of variance (ANOVA), Computer Vision, and Flutter.

[LINK](#)

- CodeBuddy: Designed and implemented an AI-driven learning agent for beginner developers, leveraging LangChain-based orchestration, intelligent caching strategies, and resource-efficient architectures to ensure scalable performance under constrained environments.

[LINK](#)

- AidMate: Led the development of an AI-powered first aid assistant using Retrieval-Augmented Generation (RAG) and TF-IDF-based semantic search, delivering high-accuracy responses with robust offline capabilities across a cross-platform Flutter application.

[LINK](#)

- AI-Powered Job Application Automation: Built an AI-powered job application automation workflow using n8n, Significantly reduced manual effort in job application preparation through workflow automation, CV tailoring, email generation, and Google Sheets tracking.

[LINK](#)

- Pandas Background: Developed an end-to-end background removal system, processed images in under 2s on mobile devices using Fast API, Android, and You Only Look Once (YOLO).

[LINK](#)

- SVM-Hinge Developed and implemented a Support Vector Machine with hinge loss.

[LINK](#)

- Xiaomi Social Analysis: Performed real-time social media analysis, diagnosing frequent user complaints using Kafka, Reddit, Python, and GPT, achieving 70% accuracy.

[LINK](#)

Certifications

- DeepLearning.ai ML Specialization, IBM Badges (CV, LLMs, Deep Learning Generative AI), Agents(HuggingFace), RL (HuggingFace), Advanced Databases from Meta, Power BI (Microsoft), Excel (Microsoft), Linux (Linux Foundation).

Experience

Cloud Computing Training

2024 – 2025

SRTA-CITY

- Gained hands-on experience in virtualization, fault tolerance, and cloud models (IaaS, PaaS, SaaS).

AI Training

2025 – 2026

X-Clan

- AI team lead, developed AI systems focused on cost optimization with high performance.
